INTERNSHIPS AND RESEARCH

Research Intern

Applied Research Laboratory (June 2020 - July 2020)

- Studied the application of altimetry for measuring change in biomass and ocean levels.
- Researched acoustics as a means of measuring increase in ocean temperatures, as well as ocean acidification and hypoxia.

Embedded Software Engineer

Silicon Labs (June 2019 - August 2019)

- Wrote embedded C programs on Silicon Labs microcontrollers used by MCU customers as design reference.
- Wrote code for low energy peripherals and wireless functionalities of 32-bit MCUs.

International E-Commerce Business Founder

Pacific Leap (June 2019 - October 2019)

- Started e-commerce business selling smart-devices based on market and competition analysis.
- Negotiated with Chinese partners to manufacture hardware and co-developed mobile apps for products.
- Coordinated with international logistics companies to export from China and import to the US.

PROJECTS

Visualize - Vision AI, iOS App

- Created app that helps the blind "see" by having a vision AI see through their phone camera and verbalize what is in front of them.
- Configured Microsoft Computer Vision API and Apple CoreML for image recognition.
- Designed minimalistic UI to ensure usability for target demographic.
- Received feedback from local school of the visually impaired.

Pin It - Social Media App

- Created social media app for staff and students of school district to catalog places visited for contests/conferences on a virtual map.
- Programmed Swift frontend, Vue.js admin panel, and Firebase cloud functions in Javascript.

ACADEMIC BACKGROUND

University of California, Berkeley

EECS, Graduating on May, 2024

Westlake High School

Class of 2020, Highest Honors, Ranked in top 10 out of 700

- President, Computer Science Club
- Founder, Accessible Programming Club
- General Secretary, Junior States of America
