EDUCATION

University of California, Berkeley

B.S. in Electrical Engineering and Computer Science, GPA: 4.0/4.0

Berkeley, CA

Class of 2024

- **Technical Coursework:**

Introduction to ML (CS189)	Introduction to AI (CS188)	Optimization Models
Efficient Algorithms	Probability for Data Science	Discrete Math and Probability Theory
Computer Architecture	Data Structures	Structure of Computer Programs
Designing Information Devices and Systems I/II	Physics for Engineers	

- **Skills:**

PyTorch, Sklearn, NumPy, Pandas, CVXPY, Java, Python, Swift, JavaScript, C, Embedded C, RISC-V, Golang, R, Scheme, Lisp, Matlab, React Native, AWS SAM, MySQL, Vue.js, React.js, Express.js, Node.js, MongoDB, Selenium

EXPERIENCE

Stroll

Co-founder

Berkeley, CA

April 2021–Now

- Founded “TripAdvisor for safety” startup admitted to SkyDeck Batch 13 incubator program (3% acceptance rate).
- Implemented scrum product management process to develop React Native mobile app and AWS SAM backend.
- Devised safety based GPS route generation algorithm using Open Street Map and local crime data.

Autodesk

Software Engineering Intern

San Rafael, CA

May 2021–August 2021

- Developed C++ binary tamper-detection code to secure license checking SDKs from attackers.
- Created JavaScript tool on Jenkins which discovered and resolved 300+ program defects on customer facing servers.

Applied Research Laboratory

Research Intern

Austin, TX

June 2020–July 2020

- Programmed algorithm for calculating sonar signal detectability under various submarine deployment environments.
- Acquired knowledge in the research areas of altimetry, machine learning algorithms, and acoustics.

Silicon Labs

Embedded Software Intern

Austin, TX

June 2019–August 2019

- Wrote Embedded C programs on Silicon Labs microcontrollers used by MCU customers as design reference.
- Developed codebase to support BGX Bluetooth boards on 32-bit systems after discovering missing compatibility beyond 8-bit systems.
- Wrote and updated code for low-energy peripherals on 32-bit MCUs.

PERSONAL PROJECTS

- **App Developing Experience**

- Led team of engineers, using agile product management strategies, to develop and publish 5 apps to the App Store with 24,000+ downloads.
- Created Visualize, an affordable solution for the blind to “see” using text-to-speech, by combining the usage of mobile phone cameras and Apple’s Core ML framework. Received 9,000 downloads.
- Created Immolation Organization and ranked top 20/600 in game-programming contest officially hosted by GitHub.

- **Owner of YouTube Channel**

- Passionate animator with 7,000 subscribers and 3,000,000+ views from 30+ stop motion films.

AWARDS

USACO Gold Division (top 600 out of 10,000 participants), **Best of Texas 2nd place** (state wide programming contest), **GitHub GameOff winners** (Ranked top 20 out of 600 submissions), **ranked 1st place team and 3rd place individual in TACC Coding Contest** (invitational coding contest between 50 admitted teams hosted by the University of Texas at Austin).
